Puppet Making Guides

How to make a paper ball puppet

About Puppetify!

Puppetify! is a creative advocacy project. It explores how puppet making can start wellbeing conversations between children and the adults who care for and support them.

In Puppetify! workshops, we invite children to make a puppet version of themselves. Making a puppet of yourself lets you share how you feel about who you are, your life, and the world around you.

Chatting about the puppets gives children a chance to explain their creative choices. Sharing the puppets and operating each others' puppets promotes empathy, care, and shared experiences.

If you are interested in Puppetify!, or would like a workshop in your school or setting, please contact Dr. Amy Skinner, the project leader: A.E.Skinner@hull.ac.uk

This guide shows you how to make one of the puppets that we use in Puppetify! workshops.

How to make a paper ball puppet: a step-by-step guide

This simple puppet is designed for use with children at Key Stage 2 and above.

It is made using scrunched up paper, fabric, and tape.

You can use anything you like to decorate the puppet.

You can chose to make a puppet that you move with your hands, or you can add string to make a simple marionette (string puppet).

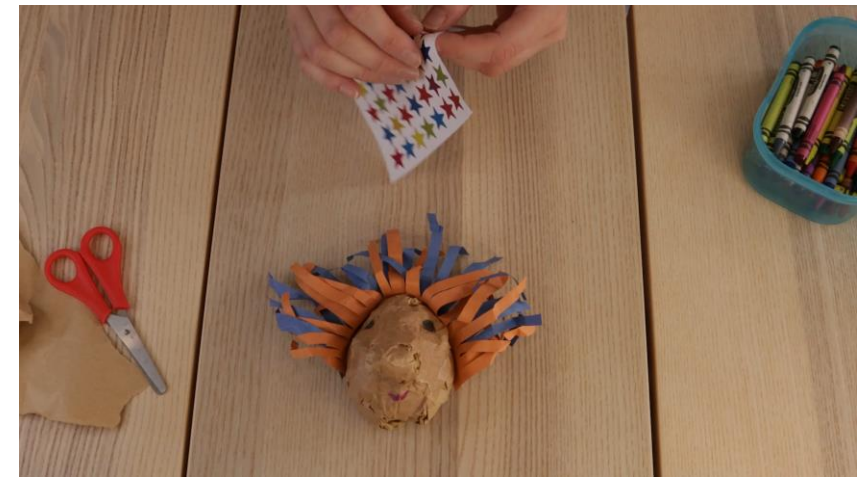

If you find this guide helpful, please let us know! You can email Dr. Amy Skinner (A.E.Skinner@hull.ac.uk).

Don't forget to share your puppet with us on Instragram #PuppetifyMe and tag us @puppetifyme

Step one: make your puppet's head

Start with a ball of paper...

- Scrunch your paper a couple of times to make it soft
- Tape your paper into a ball shape. This will be your puppet head.
- Add extra paper to change the shape of the head: do you want to add a chin, a nose or a forehead?
- Decorate your head: you can add eyes, a mouth, ears and hair, or anything else you think your puppet needs!

Step two: make your puppet's hand

Anything can be a hand..

- You can scrunch up paper to make fingers and tape them together
- You can cut a hand shape from card and decorate it
- You can even use a little wooden spoon or fork!

You only need to make one hand for this puppet - but if you want, you can add a second one.

Step three: assemble your puppet

Putting it all together...

- Choose a square piece of fabric to be your puppet's body
- Take one corner of the fabric and tape it to the back of your puppet's head. Make sure it's really well stuck!
- Find the next corner of the fabric – make sure it's one of the corners next to the puppet's head.
- Tape your hand to this corner

Your puppet is ready to use!

Try your puppet out:

- Can your puppet wave?
- Can your puppet take a bow?
- Can your puppet dance?
- How might your puppet move if it was happy?
- What about if it was sad? Or scared? Or excited?

Making a marionette

How to turn your puppet into a marionette (string puppet)

- To make a marionette, you'll need two pieces of string and two puppet hands
- Attach your second puppet hand to the corner of the fabric opposite your first hand
- Tape the first piece to your puppet's head: start by taping one end of the string to one side of the puppet's head. Then tape the other end to the other side, making a big loop
- Attach your puppet's hands to the ends of your second piece of string, so you have one hand at each end of the string

How to use your marionette

Hold one of the loops of string in each hand.

Move your hands up and down to make the puppet's head and arms move.

Top Tip:

If your strings are too long, you can make them shorter by tying a knot.

Puppetify! puppet making guides

You can download our puppet making guides on the Puppetify! website.

If you'd like more information on using the puppets to start conversations, you can also download our top tips for talking about the puppets.

All of the puppets photographed in this guide were made by our collaborators at Castledyke Primary School and the University of Hull
